DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. The disclosure is objected to because of the following informalities: Applicant should remove "and methods" from the title of the application as there are no method claims presented.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 16-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 16 includes a parenthetical expression "(or at least a substantial proportion of the debris)". Expressions enclosed by parentheses are considered indefinite as it is unknown if they are to be taken as limitations or not.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

Application/Control Number: 10/074,777 Page 3

Art Unit: 1744

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- 6. Claims 16-20, as best understood, and 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Vanderlinden.
- 7. Vanderlinden discloses all of the recited subject matter and with respect to the limitation "such that debris received through said inlet may be deposited upon said debris transport mechanism such that gravity and friction maintain the debris (or at least a substantial proportion of the debris) upon the transport mechanism without the assistance of a scoop or a cleat for a sufficient amount of time to facilitate transportation", Vanderlinden is considered to meet that limitation as the transport mechanism is considered to have a sufficient friction to maintain the debris for a sufficient amount of time. The amount of time not being defined by the claim.

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.

Application/Control Number: 10/074,777

Art Unit: 1744

- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 10. Claims 1-4, 6-8, 10-13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vanderlinden in view of Zoni.
- The patent to Vanderlinden discloses most of the claimed subject matter with exception of a shaking mechanism connected to the filter 72. The patent to Zoni discloses a similar device in which there is an automatic shaking mechanism 24 attached to the filter 22. It would have been obvious to a person skilled in the art at the time the invention was made to provide a shaking mechanism to the filter of Vanderlinden in view of the teaching of Zoni in order to remove debris adhered to the filter.

Allowable Subject Matter

- 12. Claims 5, 9 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 13. Claims 22, 23 and 24, as best understood, would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Terrence R. Till whose telephone number is (571) 272-1280. The examiner can normally be reached on Mon. through Thurs, and every other Friday.

Application/Control Number: 10/074,777 Page 5

Art Unit: 1744

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J. Warden can be reached on (571) 272-1281. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
